SUMMARY

Software Engineer with 1+ year of hands-on experience developing modern web applications using React.js, JavaScript, Python, FastAPI, and PostgreSQL. Worked on enterprise applications in the travel technology domain, developing responsive user interfaces, REST APIs, and backend services. Familiar with Generative AI concepts including Retrieval-Augmented Generation (RAG), vector databases, prompt engineering, and Multi-Agent Systems. Strong understanding of frontend development, API integration, database design, and Agile software development.

SKILLS

Frontend

React.js, Next.js, TypeScript, JavaScript (ES6+), Redux Toolkit, Zustand, Tailwind CSS, Material UI, HTML5, CSS3

Backend

Python, FastAPI, REST APIs, Node.js, Express.js, PostgreSQL, MongoDB

Database

PostgreSQL, MongoDB

AI & GenAI Technologies

OpenAI API, RAG Pipeline, Vector Database, Prompt Engineering, Multi-Agent Systems, LangChain

Tools & Package Management

Git, GitHub, Postman, VS Code, Vite, npm

Testing & Quality

Playwright, Cypress, Jest

Cloud & DevOps

CloudFront, S3, CloudWatch, GitHub Actions, GitLab CI/CD, Docker

WORK EXPERIENCE

Full Stack Software Development Intern

February 2026 - Current

Middlebox Solutions Pvt. Ltd.

Bengaluru

- Developed responsive travel booking web applications using React.js and JavaScript.
- Built reusable UI components for booking, customer management, and dashboard modules.
- Developed REST APIs using Python and FastAPI.
- Integrated frontend applications with backend services and PostgreSQL databases.
- Optimized API performance and improved application responsiveness.
- Fixed production issues and implemented new business features.
- Collaborated with QA, backend developers, and business teams in Agile Scrum.
- Used Git for version control and participated in code reviews.
- Worked on authentication, form validation, and API integration.
- Contributed to deployment and testing activities.

Software Developer Intern

June 2025 - February 2026

Middlebox Solutions Pvt. Ltd.

Bengaluru

- Assisted in developing frontend applications using React.js, JavaScript, HTML5, and CSS3.
- Built reusable UI components following component-based architecture.
- Developed and tested REST APIs using Python and FastAPI.
- Worked with PostgreSQL for CRUD operations and database queries.
- Learned backend development using FastAPI and API documentation with Swagger.
- Participated in debugging and fixing frontend and backend issues.
- Worked with Git and GitHub for source code management. Supported the development of travel management modules.
- Gained practical exposure to Agile software development practices.
- Learned AI fundamentals, Retrieval-Augmented Generation (RAG), and Multi-Agent Systems.

ACADEMIC PROJECTS

WorkMate – Task Management Application

Tech Stack: React.js, JavaScript (ES6+), HTML5, CSS3, React Hooks, Local Storage

- Developed a responsive task management application using React.js with a reusable, component-based architecture, delivering a clean and intuitive user experience.
- Designed and implemented complete CRUD functionality, enabling users to create, update, delete, categorize, prioritize, and track daily tasks efficiently.
- Implemented state management using React Hooks (useState, useEffect) and persisted application data with Local Storage, ensuring seamless data retention across browser sessions.
- Built a real-time progress tracking dashboard that dynamically calculates task completion percentages and provides users with visual productivity insights.
- Developed reusable and maintainable UI components by following React best practices, improving scalability and simplifying future feature enhancements.
- Followed modern frontend development practices, including reusable components, clean code principles, and modular project structure.

SkyCast – Weather Forecast Web Application

Tech Stack: React.js, JavaScript (ES6+), Tailwind CSS, Fetch API, Open-Meteo API

- Developed a responsive weather forecasting application using React.js that provides real-time weather information based on user location and city search.
- Integrated Open-Meteo Geocoding and Forecast APIs using the Fetch API with async/await to retrieve and display accurate weather data.
- Implemented efficient state management using React Hooks (useState, useEffect) to handle weather data, loading states, and error handling.
- Prevented memory leaks and stale state updates by implementing proper API request cleanup within the useEffect lifecycle.
- Processed and mapped WMO weather codes to user-friendly weather conditions, displaying temperature, feels-like temperature, humidity, wind speed, and weather status.
- Built a responsive and modern user interface using Tailwind CSS, ensuring a consistent experience across desktop and mobile devices.
- Followed reusable component architecture, clean coding practices, and modern React development standards to improve maintainability and scalability.

Live: affan-anwar.github.io/skycast-weather-app

Personal Portfolio Website

Tech Stack: React.js, JavaScript (ES6+), CSS3, Vite, Formspree

- Developed a responsive personal portfolio website using React.js to showcase projects, technical skills, and professional experience with a modern and intuitive user interface.
- Designed a component-based architecture with reusable React components, improving code maintainability and scalability.
- Implemented dynamic navigation with active section highlighting using React Hooks useEffect and scroll event listeners to enhance user experience.
- Integrated Formspree API using the Fetch API to enable a fully functional contact form with loading, success, and error state handling.
- Followed modern frontend development best practices, including reusable components, responsive web design, and clean, maintainable code.

EDUCATION

Khaja Bandanawaz University, Kalaburagi, Karnataka

August 2021 - June 2025

Bachelor of Engineering (B.E.) - Computer Science & Engineering
